TOPIC: THE EFFECT OF WASTE MANAGEMENT PRACTICE ON WASTE DISPOSAL IN NIGERIA

1.2 Statement of the Problem

The problem facing this research is to conjecture the effect of waste management practices in Nigeria. The increase in population, industrial commercial, technological and economic activities has resulted in the growth of waste and its effect in our environment. Therefore the formulation and implementation of effective strategy is imperative for the management of waste disposal in Nigeria.

1.3 Aims/Objectives of the study

The aim is to examine the effect of waste management practice on waste disposal in Nigeria.

1. To identify the impact of change such a flooding, lower health and decrease in socioeconomic development in our society.
2. To identify the negative impact of bad waste management and unhealthy disposal practice.
3. To find out the impact of increase in global temperature to climate patterns.
4. To known the impact of population urbanization, social development, resource exploitation and unchecked technological advances.

1.4 Research Questions

1. What are the impact of change such as flooding, lower health and decrease in socioeconomic development in our society.
2. What are the negative impact of bad waste management and unhealthy disposal practice?
3. What are the impact of increase in global temperature to climate pattern in Nigeria
4. What are the impact of population urbanization, social development, resources exploitation and unchecked technological advances in Nigeria
