Analysis of maintenance culture employed in public infrastructure in Nigeria

STATEMENT OF THE PROBLEM

For a culture to be maintain the country there should be does and don't guiding the country under the control of a leader. It is only when a culture is well maintained that brings about good maintenance of public facilities.

For this maintenance culture to be successful it requires a good leader that leads with good character in which people can easily emulate

However, when maintenance culture is not well carried out, affects the public facilities and brings down the value and quality of public facilities.

AIM OF THE STUDY

The aim is the implementation of good leadership to be emulated by people over the maintenance of culture in order to maintain, preserve and protect the public facilities.

OBJECTIVE OF THE STUDY

To examine the level in which the long law guiding the maintenance culture is carried out.

1. To determine the merits of good culture maintenance on public facilities.
2. To identify the challenges against effective maintenance culture in public facilities.

RESEARCH QUESTION

1. What is the level in which the law guiding the maintenance in culture is being carried out?
2. What are the advantages of good culture maintenance on public facilities?
3. What are the challenges against affection maintenance culture in public facilities?

SUMMARY

A country requires a good leader who practice and know the value impact of good maintenance culture in the society in which have effect on public facilities.

The leader needs to lead with good example for people to learn from him/her.

A country that does as good as people who cannot maintain public facilities because the maintenance culture deals with human character behavior, thinking, understanding etc.
