A Critical Examination On Land Use And Allocation Procedure

Statement of the problem

Aims of the study

Objectives of the study

Research questions

Statement of the problem

The main problem of this study was to examine and evaluate the physical, social and economic effect of land use activities, because there has been series of criticism against the manner by which land was allocated to people.

Aim

This research work aimed towards recognizing the existing land use situation and thus highlighting the implications and results of previous development programmes and their implications.

Objectives of the study

1. To evaluate the advantages and disadvantages of the allocation procedures?
2. To identify the achievements and shortcoming of the procedures?
3. To suggest possible means of implementing better land use and allocation procedure?

Research Questions

1. What are the advantages and disadvantages of the allocation procedures?
2. What are the achievement and shortcomings of the procedure?
3. What are the possible means of implementing better land use and allocation procedure?
