JULY 2017

STATEMENT OF THE PROBLEM

Good maintenance culture in public infrastructure in Nigeria will spur the country towards having the best facilities, improving the quality of services and fulfilling the administrative and social needs of the general public as well as economic growth of the country to be among the developed countries of the world

However these public infrastructure are currently in the most deplorable state and in most cases neglected and abandoned to deteriorate by the leaders.

Nevertheless, if proper maintenance culture in the public infrastructure is not incited in the lives of the general public as a value to be implemented and practice daily, it will pose a threat to the infrastructural advancement and also endanger the lives of the citizens and impede the economic growth of the country.

Therefore there is a need for maintenance culture to be employed in the public infrastructure and capital project. Administrative actions should be taken to preserve, maintain and protect a Structure and system to function properly.
