STATEMENT OF PROBLEM

It is a well known fact that the maintenance culture employed in public infrastructure in Nigeria is very poor and unsatisfactory. Public infrastructure like Roads, public schools, water (main water), waste disposal, Electrical power, transportation system e.g. rail, airport etc.

The idea scenario, here is transportation system rail way means of transportation. An idea rail way is meant to be kept at a distance from the coal tar road. And it also meant to have a station that is active and well functioning. And the last but not the least, it is meant to have a protector that will give a bridge between the railway road and coal tar road to indicate that a train is passing to prevent cars from passing at that moment. The reality here is that in Enugu we lack all most of these things. There is no demarcation between the coal tar road and the rail way, if care is not taken coal tar will be used to cover the rail way road. The railway station service is very poor and almost 80% of the trains packed there are dilapidated and not even working. And the consequence is the people life and property area at risk.

For example: if a car is stuck at the point of the railway road and a train is passing, the car is considered gone cause their services are poor, there is nothing like protector to warn the train. Action needs to be taken by the government is either they provide the necessary requirement to equip the rail way means of transportation to a right and standard shape that is expected of them or stop trains from passing again to protect life and property of the masses or public .

AIM

This research set to examine the maintenance culture of public infrastructure in Nigeria Enugu State Precisely.

OBJECTIVES

- To determine the maintenance culture of public infrastructure in Nigeria.-Enugu State.
- To examine the weakness of maintenance of maintenance culture of public infrastructure in Nigeria Enugu State.
- To examine the effect of these weakness of maintenance culture of public infrastructure in Nigeria Enugu State.
- To determine the possible ways of overcoming these extremely

RESEARCH QUESTION

- a. What are the maintenance culture of public infrastructure in Nigeria (ES)
- b. What are the weakness of maintenance culture of public infrastructure in Nigeria Enugu State.

- c. What are the effect of these weakness of maintenance culture of public infrastructure in Nigeria-Enugu State
- d. What are the possible solutions to this problem?
